

TECHNICAL PRODUCT SHEET

Fabric :
Glint Chiffoniglio

Emission Date:
12/04/2023

Fabric Group :

Code :
5236FGLICH

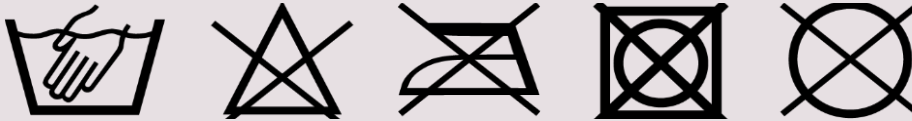

Fabric Type

Fabric for Decoration
()

Fabric for Upholstery
()

Fabric for Curtains
()

Recommended Care Istruction

Flammability

Flammability of Fabrics - Upholstered Furniture
British Standards

class _____
class _____

UNI 9175 + UNI 9176
BS 5852

Descriptive Features

Composition 93%PL 6%PU 1%Other Fibres

Warp Repeat _____ cm		Weft Repeat _____ cm
Weight Linear _____ m		Weight _____ 105±5% g/m ²
Avarage Roll Lenght _____ m		Minimum Roll Lenght _____ m
Fabric Width With Selvedge 140 ±5% cm		Fabric Width Without Selvedge 130 cm

Dimensional Stability

	Warp		Weft	
Steam Iron	_____ %		_____ %	DIN 53894
Washing With Water	_____ %		_____ %	ISO 5077/ISO 6330
Dry Cleaning	_____ %		_____ %	ISO 3175

Colour Fastness and Physical Resistance

	Warp 3/4 GS	Werp 3/4 GS	
Xenotest Light	3/4	3/4	ISO 105-B02
Color Fastness to Water	3/4	3/4	ISO 105-E01
Color Fastness to Perspiration - Acide/Alkaline	3/4	3/4	ISO 105-E04
Color Fastness to Rubbing - Dry	4	4	ISO 105-X12
Color Fastness to Rubbing - Wet	3	3	ISO 105-X12
Resistance Martindale Test 12 kPa n° Rubs	12800		ISO 12947-2

LAMINA
Categoria
D

LAMINA è un tessuto speciale dall'effetto stropicciato e dall'anima audace. Grazie a un'instancabile ricerca e innovazione nel campo dei laminati, è stato possibile trasformare la lamina, un materiale metallico, da rigido a estremamente leggero, morbido e malleabile, pur mantenendo le caratteristiche tecniche che lo contraddistinguono. L'aspetto metallico è arricchito dalla sua sgualcitura, che gli conferisce grinta e dinamicità per un prodotto informale e non convenzionale. Inoltre, la speciale lavorazione di accoppiamento al nylon lo rende super resistente e antistrappo.

LAMINA is a special fabric with a creased effect and a bold soul. Thanks to tireless research and innovation in the field of laminates, it has been possible to transform the lamina, a metallic material, from rigid to extremely light, soft and malleable, while maintaining the technical characteristics that distinguish it. The metallic look is enriched by its crumpling, giving it grit and dynamism for an informal and unconventional product. Furthermore, the special processing of coupling to the nylon makes it super resistant and tear-proof.
